

Project Development Phase

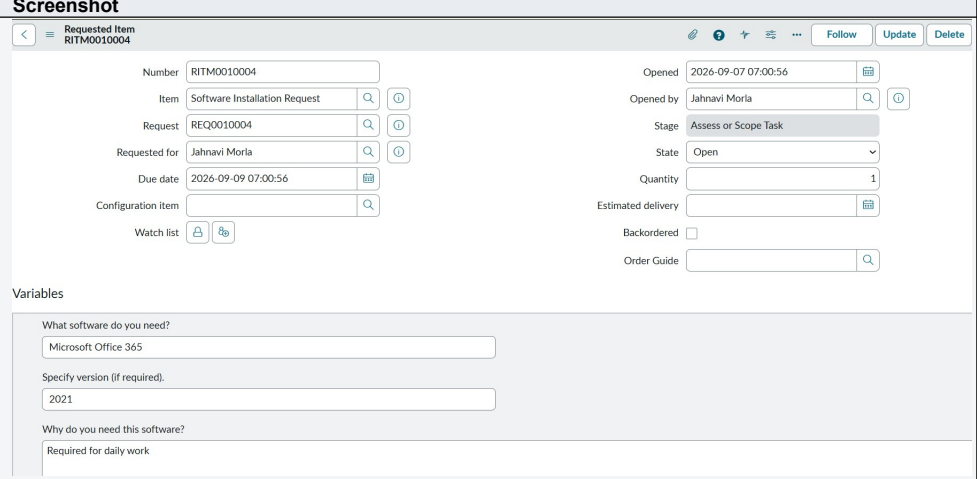

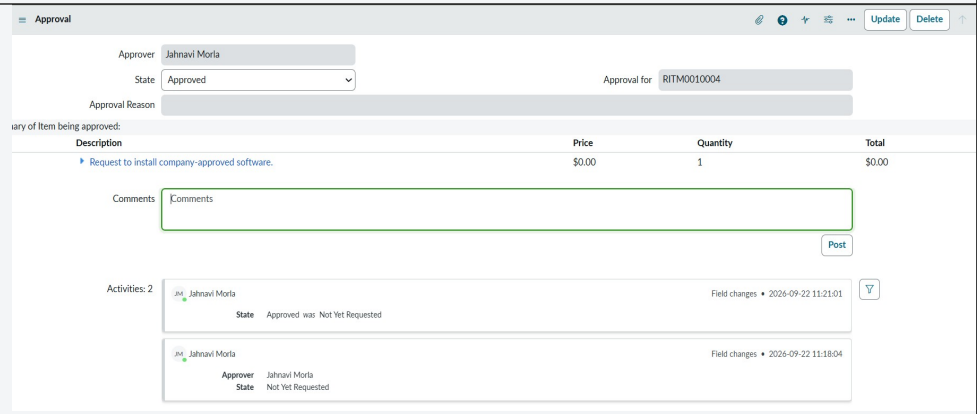

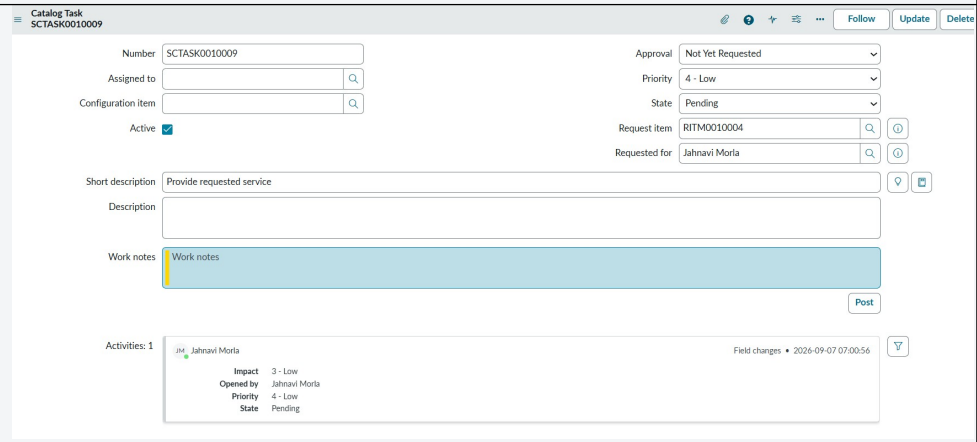

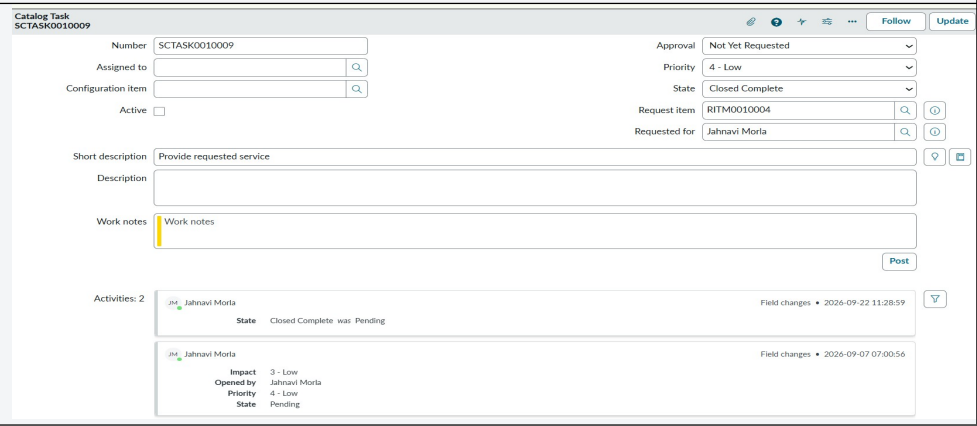

Project Testing & Validation

Date	11 September 2026
Team ID	Individual Project
Student Name	Morla Jahnvi
Project Name	An Employee Requests Installation of Licensed Software through the Service Catalog

Software Installation Request Testing:

Project team shall validate the ServiceNow licensed software request process from request creation through approval, fulfillment, automation, and deployment configuration.

S.No	Parameter	Values	Screenshot
1.	Service Catalog Item	The Licensed Software Installation Request catalog item is created and accessible to employees.	 The screenshot shows the 'Catalog Item' creation page in ServiceNow. The title is 'Software Installation Request'. The 'Name' field is 'Software Installation Request'. The 'Application' is set to 'Global'. The 'Category' is 'Software'. The 'Fulfillment automation level' is 'Unspecified'. The 'State' is 'None'. The 'Checked out' is 'None'. The 'Owner' is 'System Administrator'. The 'Short description' is 'Request to install company-approved software.' The 'Description' is empty.
2.	Request Submission	The employee enters Software Name, Version Required, License Justification, and Urgency and submits the request.	 The screenshot shows the 'Request to install company-approved software.' form. The form includes fields for 'What software do you need?', 'Specify version (if required)', 'Why do you need this software?', and 'Select urgency level.' The 'Urgency level' is set to 'High'. The 'Order this item' section shows 'Quantity' as 1 and 'Delivery time' as 2 Days. The 'Order Now' button is visible.
3.	Request (REQ)	A Service Catalog Request (REQ) is generated after the employee submits the software request.	 The screenshot shows the 'Request' details page for 'REQ0010004'. The 'Number' is 'REQ0010004'. The 'Requested for' is 'Jahnvi Morla'. The 'Location' is empty. The 'Due date' is '2026-09-09 07:00:56'. The 'Price' is '\$0.00'. The 'Description' is empty. The 'Short description' is empty. The 'Opened' date is '2026-09-07 07:00:57'. The 'Opened by' is 'Jahnvi Morla'. The 'Approval' is 'Approved'. The 'Request state' is 'Approved'.

S.No.	Parameter	Values	Screenshot
4.	Requested Item (RITM)	The RITM is created and contains the software request variables submitted through the catalog form.	
5.	Approval	The request is routed to the configured authorized approver, who can approve or reject the software request.	
6.	Fulfillment Task (SCTASK)	After approval, a Catalog Task is generated and assigned to the Software Support Team for fulfillment.	
7.	Task Completion	The Software Support Team completes the installation task and updates the task state to the configured completion state.	

S.No.	Parameter	Values	Screenshot
8.	Business Rule / Automation	The configured ServiceNow automation executes the required request, approval, notification, and fulfillment actions for the software request process.	Business Rule License Issue ss rule is a server-side script that runs when a record is displayed, inserted, deleted, or when a table is queried. Use business rules to automatically change values in form fields when the specified conditions are met. More Info Name License Issue Application Global Table Requested Item [sc_req_item] Active ☒ Advanced ☒ run Actions Advanced Condition current.state.changesTo(3) Script Turn on ECMAScript 2021 (ES12) mode 1 (function executeRule(current, previous /*null when async*/) { 2 3 if (current.state.changesTo(3)) { 4 var inc = new GlideRecord('incident'); 5 inc.initialize(); 6 inc.short_description = 'License unavailable for ' + current.request_item; 7 inc.description = 'Software request could not be fulfilled due to license shortage.'; 8 inc.caller_id = current.request.requested_for; 9 inc.assignment_group.setDisplayValue('Software Support'); 10 inc.priority = 3; 11 12 inc.insert(); 13 14 }
9.	Update Set	The project configurations are captured in an Update Set so the configured ServiceNow components can be migrated and deployed in a controlled manner.	Update Set Software Installation Request Setup * Name Software Installation Request Setup State Complete Parent Release date Install date Installed from Description Update set for software installation request workflow and business rules.
