

User Acceptance Testing (UAT)

Date	12 September 2026
Team ID	Individual Project
Student Name	Morla Jahnavi
Project Name	An Employee Requests Installation of Licensed Software through the Service Catalog

Project Overview:

Project Name: An employee requests installation of licensed software through the Service Catalog.

Project Description: A ServiceNow solution that standardizes licensed-software requests, captures required details, routes requests for approval, creates a fulfillment Catalog Task for IT Support, and provides request status visibility.

Project Version: 1.0

Testing Period: 22 September 2026 to 24 September 2026

Testing Scope:

- Service Catalog item accessibility and form behavior.
- Capture of software name, version, justification and urgency.
- REQ and RITM creation and relationship.
- Approval and rejection processing.
- SCTASK creation, assignment and completion.
- Configured automation and notifications.
- Update Set capture and migration readiness.
- End-to-end request processing.

Testing Environment:

URL/Location: ServiceNow Personal Developer Instance (PDI)

Credentials: Authorized instance credentials were used; credentials are not recorded in this document.

Test Cases:

The following UAT cases are tailored to the licensed software request workflow and cover the complete request-to-fulfillment lifecycle.

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Catalog item access	1. Open ServiceNow. 2. Open Service Catalog. 3. Open Licensed Software Request.	Catalog item opens and shows the configured request form.	Validated successfully.	Pass
TC-002	Request information capture	1. Enter software name. 2. Enter version. 3. Enter justification. 4. Select urgency. 5. Submit.	Submitted request retains all entered details.	Validated successfully.	Pass
TC-003	REQ and RITM creation	1. Submit request. 2. Open the generated REQ. 3. Open its RITM. 4. Compare variables.	REQ and matching RITM are created with submitted variables.	Validated successfully.	Pass
TC-004	Approval processing	1. Submit request. 2. Open approval record.	Request reaches the configured approver and the	Validated successfully.	Pass

		3. Review state. 4. Process with configured approver.	decision is recorded.		
TC-005	Rejection handling	1. Submit test request. 2. Open approval. 3. Reject it. 4. Review request state.	Rejected request does not proceed through normal fulfillment.	Validated successfully.	Pass
TC-006	SCTASK creation and assignment	1. Complete approval. 2. Open Catalog Task. 3. Check assignment group. 4. Verify state and RITM.	SCTASK is created and assigned to the configured Software Support group.	Validated successfully.	Pass
TC-007	Task completion	1. Open SCTASK. 2. Review task details. 3. Move through completion state. 4. Save.	Task reaches the configured completion state correctly.	Validated successfully.	Pass
TC-008	Automation and notifications	1. Execute request flow. 2. Review automation. 3. Check record changes. 4. Check notifications.	Configured automation and notifications execute at the required stages.	Validated successfully.	Pass
TC-009	Update Set capture	1. Open project Update Set. 2. Review captured records. 3. Verify contents. 4. Check migration readiness.	Project configurations are captured and available for migration validation.	Validated successfully.	Pass
TC-010	End-to-end validation	1. Submit request. 2. Verify REQ/RITM. 3. Process approval. 4. Verify SCTASK. 5. Complete task. 6. Review final state.	Complete request lifecycle works without missing records or required data.	Validated successfully.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No functional defect identified during documented UAT.	Not applicable unless a new defect is observed.	Low / Medium / High	Closed	Continue monitoring after future configuration changes.

UAT Summary:

The validation covers catalog access, request data capture, REQ/RITM creation, approval and rejection, SCTASK fulfillment, task completion, automation, Update Set capture, and the complete end-to-end workflow.
