Share feedback

Steps

What does the person typically experience?

Learns about the software request process and checks which software is available.

Logs in to ServiceNow and navigates to the Service Catalog to find the software request item.

Fills in the request form with required details (e.g., software name, version, justification, urgency) and submits the request.

Request goes to manager/approver for review and approval.

IT support team receives the approved request, creates a Catalog Task and installs the software.

Receives notifications about approval, installation progress and completion.

Uses the installed software for work.

Provides feedback (if required) and the request is closed.

Interactions

What interactions do they have?
Things, Places, People?

Discusses with colleagues, reads IT policies or FAQs.

Interacts with ServiceNow portal (PC or mobile), searches Service Catalog, views software details.

Enters information in the catalog request form, attaches supporting documents (if any) and submits.

Manager/Approver receives notification and reviews the request in ServiceNow.

IT support team works on the Catalog Task, may contact the requester for clarifications.

Receives email/in-app notifications about approval, task progress and completion.

Uses the software on the assigned device/system.

Interacts with ServiceNow (feedback survey) or contacts IT if any issues.

Goals & Motivations

What is their primary goal?
("Help me...")

Help me understand how to get the required software.

Help me easily find the correct software request item.

Help me submit a complete and accurate request quickly.

Help me get my request approved without unnecessary delays.

Help me get the software installed correctly and securely.

Help me stay informed about the status of my request.

Help me use the software to perform my work efficiently.

Help me share my feedback and get support if needed.

Positive Moments

What is enjoyable, productive, or satisfying?

Clear information from IT and colleagues.

Easy to navigate Service Catalog with search and categories.

Simple and user-friendly request form.

Quick approval and status visibility.

Timely installation by IT team.

Proactive notifications about progress and completion.

Software works as expected and supports my work.

Option to provide feedback and a smooth closure of the request.

Negative Moments

What is frustrating, confusing, or time-consuming?

Unclear process or don't know which software is available.

Difficulty finding the correct catalog item or software details.

Confusion about mandatory fields or what information to provide.

Approval delays or rejections without clear reason.

Delays in installation or lack of updates from IT.

No real-time status or missing notifications.

Installation issues or software not working as expected.

No feedback option or unresolved issues after completion.

Areas of Opportunity

How might we make it better?
What ideas do we have?

Provide clear communication about available software and guidelines.

Improve search, categorization and descriptions in the Service Catalog.

Add field guidance, examples and validation to avoid incomplete requests.

Automate approval reminders and provide visibility on approver status.

Set clear SLAs for fulfillment and send regular updates.

Enable real-time status tracking with automated notifications at each stage.

Provide self-help guides and support for common issues.

Include a feedback survey and an option to reopen the request if issues persist.
